

All performances and calibration are carried out by using hydraulic oil with viscosity approx 46 cSt at 50°C
Temperature range: -20...+80°C
Filtration absolute: 25 μm

TECHNICAL DATA

	Measurement unit	Value
Adj. pressure range of relief valve	bar.	30...250
Standard setting	bar	120
Nominal flow rate of P and T	L/min	40
Nominal flow rate of A and B	L/min	25
Power supply	V DC	12,24

ORDERING CODE

BV 47 / 1 RS06V38/12
